

**COACHES, OFFICIALS
& VOLUNTEERS**

**COVID SAFE
RETURN TO ROWING
GUIDELINES**

Rowing Victoria has developed the following guidelines to assist the safe return to rowing training during the COVID-19 pandemic.

These guidelines are aimed at limiting the spread of COVID-19 and ensuring participant and community safety as we return to rowing. These guidelines must be read in conjunction with the current directives and guidelines of the Victorian Government and the relevant local council.

In returning to rowing, Rowing Victoria's priority is the preservation of public health and minimising the risk of community transmission to enable a safe and gradual return to sport for all. From participants to volunteers, to coaches, parents, spectators and staff, the entire rowing community has an important role to play in helping to slow the spread of COVID-19.

We encourage everyone to download the federal governments COVIDSafe app.

This guidance is current as at 12 October 2020

To minimise the risk of contracting or transmitting COVID-19, coaches, officials, and volunteers must adhere to the following:

- ✓ Do not attend training if you are unwell and experiencing symptoms such as a cough, sore throat, fever, fatigue or shortness of breath.
- ✓ Do not attend training if, in the last 14 days, you have been unwell or had close contact with a known or suspected case of COVID-19. This includes while you are being tested.
- ✓ Any participant who is unwell should see a doctor in accordance with local Public Health Authority guidelines.
- ✓ Support Participants in their return to training, including adherence to the Participant guidelines (see Participants User Guide).
- ✓ Consider vulnerable participants as they may be at increased risk.
- ✓ Ensure a fitted face mask or buff is worn at all times when coaching in line with guidance by the Victorian Government

Management of a suspected COVID-19 case or confirmed COVID-19 case:

- ✓ Participants must follow Public Health Authority / State Government processes upon confirmation of a positive COVID-19 case.
- ✓ Member Organisations, associations, clubs and venue managers to assist the Department of Health in contact-tracing and potentially shutting/reducing access to training if there has been a positive case in the area.

Face masks

What you can and cannot wear

A fitted mask needs to be worn covering both your nose and mouth.

You can wear a face shield with a fitted face mask.

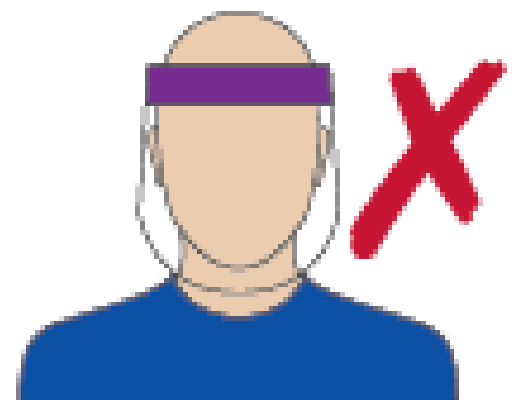

A fitted snood, Buff® or gaiter can be worn covering both your nose and mouth.

There are two types of face masks you can wear: cloth masks and surgical masks.

- Cloth masks are made of washable fabric and can be washed and re-used.
- Surgical masks are single-use masks and **cannot** be washed or re-used.

You cannot wear a bandana or scarf on its own.

You cannot wear a face shield on its own.

You cannot wear a loose snood, Buff® or gaiter on its own.

How to put your mask on

Step 1: Wash your hands with soap and water before putting on the mask.

Step 2: Make sure the mask covers your nose and mouth and fits snugly under your chin, over the bridge of your nose and against the sides of your face.

Do not touch the front of the mask while wearing it.

Step 3: If you do touch the mask, wash your hands with soap and water or sanitise your hands immediately.

Do not allow the mask to hang around your neck.

How to take your mask off

Step 1: To remove the mask, wash your hands with soap and water or sanitise your hands first.

Step 2: Carefully remove your mask by grasping the ear loops or untying the ties. For masks with a pair of ties, unfasten the bottom one first, then the top one.

Step 3: If your mask has filters, remove them and throw them away.

Step 4: Fold the mask and put it directly into the laundry or into a disposable or washable bag for laundering. Single-use surgical masks should be disposed of responsibly and not be re-used.

Step 5: Wash your hands with soap and water or sanitise your hands after removing the mask.
